SUMMARY

Junior Full-Stack Developer passionate about building modern web applications with practical backend experience. Experienced in developing real projects using Next.js, React, Prisma, and server-side logic. Continuously improving skills in system design, performance, and writing clean code.

Open to learning, collaboration, and contributing to production-level systems.

EDUCATION

Bachelors of Science, Major in Game and Interactive Media

Bangkok University

GPA 3.72 (First Class Honor)

Jul 2020 - Dec 2023

EXPERIENCE

Full-Stack Web Developer

Mar 2024 – Present

Self-Initiated Projects

Responsibilities

- Designed and developed multiple web applications and corporate showcase websites as independent projects. Managed full development lifecycle including UI design, frontend implementation, backend logic, database schema design, and deployment.

Thesis Project Developer

Aug 2023 – Dec 2023

Performed duties as a Warehouse Officer

Responsibilities

- Developed the core gameplay system including character movement, camera control, and main game logic using Unity and C#.

Game Developer (Academic Projects)

Jul 2020 – Dec 2023

Bangkok University

Responsibilities

- Led development for most academic game projects as Lead Developer - Built gameplay mechanics, player controls, UI menu systems, and sound systems - Developed health systems, combat logic, and interaction systems - Built shop systems, enemy AI behaviors, and progression systems

SIDE PROJECTS

Fullstack Portfolio - Website

- This portfolio website was created to introduce myself and showcase the projects I have worked on. It also includes my skills, experience, and contact information in one place.

Link In Bio (Glassmorphism) - Website

- A personal link-in-bio website designed to glassmorphism style, showcasing socials links, more projects, and key platforms in a clean and minimal interface with music player

MNT Food Machine - Demo Website

- A modern website designed to showcase the company's services, expertise, and portfolio in the food machinery industry.
